EDUCATION

Sri Venkateshwara College Of Engineering

B.Tech in Computer Science & Engineering | CGPA: 8.85

Tirupati, AP, India

2023 – 2027

Geetam Junior College

Intermediate (Class XII) | 90.1%

Proddatur, AP, India

2021 – 2023

Aditya High School

Secondary School (Class X) | GPA: 10/10

Proddatur, AP, India

2020 – 2021

EXPERIENCE

Infosys

Nov 25 – Jan 30

Designed and developed an Autonomous Learning Agent project using AI with Tavily search tools.

- Built a multi-agent AI research system using Tavily APIs and LangGraph, enabling automated data collection, analysis, and report generation.
- Implemented parallel agent workflows with supervisor coordination to improve efficiency and task reliability.
- Designed project pipelines and optimized decision-making processes, enhancing autonomous agent performance.
- Documented research findings and presented AI solutions to mentors, demonstrating tool integration and practical application.

COURSEWORK

- **Data Structures & Algorithms** – Problem solving, time complexity, recursion, and optimization techniques
- **Web Development** – Built responsive applications using React, Node.js, and REST APIs
- **Operating Systems** – Process management, memory management, and system design concepts
- **Database Management Systems** – SQL, normalization, and relational database design
- **Artificial Intelligence** – Basics of machine learning and LLM-based applications

PROJECTS

Netflix-GPT | *React.js, Redux, Tailwind CSS, Firebase, OpenAI API*

[GitHub](#) [Live](#)

- Built a Netflix-like web app with Firebase authentication and protected routing
- Implemented GPT-based movie search using OpenAI API for personalized recommendations
- Managed state using Redux and optimized performance with custom hooks and memoization

YouTube Clone | *React.js, Tailwind CSS, YouTube API*

[GitHub](#) [Live](#)

- Developed a YouTube-like video streaming app with responsive UI using React and Tailwind CSS
- Integrated YouTube Data API to fetch videos, search results, and channel information
- Optimized performance using reusable components and efficient state management

TECHNICAL SKILLS

- **Languages & Databases:** C/C++, JavaScript, HTML5, CSS3, MongoDB, Firebase
- **Frameworks/Libraries:** React.js, Node.js, Express.js, Tailwind CSS, Redux
- **AI/ML:** Machine Learning (Basics), Large Language Models (LLMs), Prompt Engineering, LangGraph, Tavily API
- **Tools:** Git, GitHub, VS Code, Postman, Chrome DevTools, npm
- **Core CS:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPs

ACHIEVEMENTS

- Achieved **Oracle Certified Professional (OCI 2025 – Generative AI)**
- Completed **TCS iON Career Edge – Young Professional** certification
- Qualified for **Tata Crucible Campus Quiz 2025 – Prelims Level 1**
